Experience

Coinbase   Remote / San Francisco, California
Product Manager (started as Software Engineer)   Feb 2020 – Jun 2022
- **Pitched and built a new product (Coinbase Pay)** to the executive team; from ideation to design to implementation
- Tech lead for feature that allowed instant withdrawals using debit cards
- Contributed to release of Paypal and Apple Pay support

Early-stage Startups   San Francisco, California
Entreprenuer / Software Engineer   Feb 2018 – Dec 2019
- **Attempted to build a crypto wallet** which had multi-sig capabilities; struggled with product-market fit
- Freelanced for a startup that provided services as guarantors for renters in NY
- Worked at a series-A startup that built infrastructure billing abilities to monitor spend in AWS

Amazon   Seattle, Washington
Software Development Engineer   Jan 2017 – Feb 2018
- Part of the Continuous Delivery org in Amazon Web Services
- **Built automated dashboard building capabilities in Infrastructure-as-Code tool** used by internal teams at Amazon
- Fixes in the domain of deployment pipelines; monitors; and provisioning instances

Microsoft   Copenhagen, Denmark
Software Development Engineer   Jul 2015 – Dec 2016
- Worked on ERP product (Dynamics AX) with focus on supply chain
- Fixed in inventory management; procurement and sales
- **Built data entities to allow easy migrations** when upgrading software

Education

Jacobs University   Bremen, Germany
*Bachelor of Science in Computer Science; **GPA: 2.2/5.0 (German scale)***   Graduated 2014
- Specialized in Computational Logic and Computer Vision
- Trans-disciplinary courses in psychology, politics, music, geology, and law.

Certificates

Product School   Remote
Product Manager Certificate   Issued March 2021
- 8-week course that prepares students to successfully build software products with a team of designers and engineers.
- Students learn from real-world Product Managers at top tech companies such as Google, Facebook, LinkedIn, and Twitter.
